

# SW01

## *Road maintenance*

- **Fast & reliable**
- **Easy to operate**
- **High performance**
- **Economical**
- **Environmentally friendly**
- **Suitable for tractors with 3-point suspension**
- **Hydraulic connection and 12 Volts**

# Area of application

Road maintenance equipment for cost-effective maintenance of water retaining top coats, three point rear attachment to fit behind tractors(always 3-5 maintenance events required per year) across the entire width of the road.

## Specifications

Operating speed:	bis zu 20 km/h
Minimum requirement for tractors:	66 kW/90 pS
Preparation time (attachment - detachment):	15 Minuten

## Specifications

Transport length	2.550 mm
Transport width	2.500 mm
Transport height	1.250 mm
Operating width	2.550mm - 4000 mm
Total weight	1.300 kg
Hydraulic adjustable	7 Zylinder
Electrical energy	12 Volt

Area of application for the SWO1 road maintenance equipment:

Forestation companies and industrial communities.

The equipment is especially suitable to the maintenance of water retaining top coats such as gravel / pebbles (optimum granular size 0/15 - 0/32)

Regular road maintenance using the SWO1 road maintenance equipment will improve the operating life and conservation of the sideways and diagonal profiles, ensure better water drainage and combat excessive growth of grass and weeds between the edge of the road and the shoulder.

An excellent result has been reported by various companies that used the equipment.

Developed by experienced foresters and forestation companies.

KWF-certificate number: 5326

You can observe the equipment in action, by appointment.
